

SvalTech, Inc. Announces a Partnership with CSP, Germany

Austin, April 1, 2011 - SvalTech has completed an agreement with CSP, Germany to represent, sell and support the Chronos Database Archiving software product for North America. The Chronos product was developed by CSP, Germany and released in 2002. It has several clients in Europe who have successfully installed the product and are productively using it on several applications.

Under terms of the agreement, SvalTech will have the exclusive right to sell the product to customers in North America. It will provide sales support, trial support, installation assistance and product maintenance support for North American customers.

SvalTech will offer any additional services that the customer may need to be successful with database archiving. This includes an array of educational offerings, organizational assistance and implementation services.

Jack Olson, CEO of SvalTech says..... "This announcement brings Chronos to North American IT shops as another outstanding tool available for consideration by Database Archiving professionals in North America. We are pleased with having the ability to recommend Chronos for users whenever it is appropriate. We look forward to working with CSP, Germany to install and support Chronos in Database Archiving practices. Chronos will prove to be competitive in function, performance, and price to other Database Archiving products for most archiving applications. North American customers deserve to have all products available so they can select the best ones. Chronos will be selected often."

Mario Taeuber, Managing Director of CSP, Germany says..... "We are glad to announce, that SvalTech chose Chronos as preferred tool for Database Archiving. In SvalTech we found a partner which has a very deep understanding of customers needs for Database Archiving. With the strengths of our product Chronos SvalTech will be able to provide the best service to customers in North America including education, consulting and support on Database Archiving. The team at SvalTech is the perfect team for doing both aspects of Database Archiving, application retirement and online archiving."

SvalTech, Inc. is a company dedicated to promoting and advancing the technology of Database Archiving. It offers complete solutions to establishing Database Archiving practices and implementing important applications.

CSP, Germany is a software development company. They have been in business for 20 years and are developing tools for long-term archiving of relational databases and process data management. In addition to these tools CSP provides consulting services, support and training. Current customers of CSP are companies like BMW Group, Daimler, VW, Lufthansa, Deutsche Telekom ...
